About me: I was born in 1993 in Milan, Italy. Son of an architect and a dental technician, I get passion for electronic in general and for computers and mobile phones in particular, since early ages. In June 2012 I obtained Science Course Diploma at GSCE level. In September 2012 I started a totally new experience, called university: Electronic and Information Technology Engineering was my chose right to my passions. In August 2014 I became event manager of Zunami Events; I am the person who plans and executes the event, taking responsibility for the creative, technical and logistical elements. In February 2016 I guessed building my first own company. I achieved to build a startup called EMAT Digital Marketing with a friend of mine; EMAT is nowadays leader of the market in north-west Italy. I am also the executive in charge of BookYourBeach's technological needs as well as its research and development (R&D) from 2017. I develop policies and procedures and I use technology to enhance the product and the service that focus on external customers. As a Planner-CTO I look at how to further implement new technologies within the company to ensure its success.

● WORK EXPERIENCE

02/2016 – CURRENT – Sestri Levante, Italy

CEO & SOLUTION MANAGER – EMAT DIGITAL MARKETING S.R.L.

EMAT Digital Marketing was born from two friends partnership: we both loved the web and we had different skills: Matteo was proficient in Graphic User Interface, I was mostly oriented in Web development. We gained an excellent confidence in Data Analysis e Market Discovery working together. Later on, together with our company growth, we succeeded in enlarging our team to fill the gap in the commercial sector.

Digital marketing's objective is to promote brands, build preference, engage with customers and increase sales through various digital marketing techniques. It is embodied by an extensive selection of service, product and brand marketing tactics, which mainly use the Internet as a core promotional medium, in addition to mobile and traditional TV and radio.

CHIEF TECHNICAL OFFICER – BOOKYOURBEACH S.R.L.

I am the executive in charge of BYB's technological needs as well as its research and development (R&D). I develop policies and procedures and I use technology to enhance the product and the service that focus on external customers.

I also develop strategies to increase revenue and I perform a cost-benefit and return-on-investment analysis.

I may envision in my role how technology will be used within the company while setting the technical strategy for it. As a Planner-CTO I also look at how to further implement new technologies within the company to ensure its success.

SENIOR PHOTOGRAPHER – AIRBNB IRELAND UC

Beautiful photography is essential to success at Airbnb. Professional photos help our guests visualize Airbnb's unique spaces and help our hosts showcase their listings. Airbnb loves photography that captures homes in a natural way. The goal of our photography is to set correct expectations for our guests, rather than make the home appear brighter or larger than reality.

The photography team at Airbnb has developed an in-depth set of style guidelines for our listing photography so that hosts all around the world can expect the same exceptional style and quality from every photographer.

Responsibilities:

- Partner with Airbnb hosts to schedule and photograph assigned listings
- Photograph interiors, exteriors, unique details and environmental portraits
- Provide minimal interior styling during the photo shoot
- Retouch raw files to meet Airbnb's specific photography style
- Regular email communication with our San Francisco-based photography team

PHOTOGRAPHER - FOTO BOUQUET

Our photographic services are intended to go beyond. The wedding photographer's philosophy is to overcome the expectations of each couple for their marriage; Our photographic services always offer you something extra: a special

promotion, a last second offer, a tribute to your guests, an unexpected surprise or an unexpected thought, like a smile stolen to the bride taken from a secret photo shot at your wedding ceremony. The success of our photographic services for the wedding photographer is simply to capture the light shining in your eyes on that special day, the spark that the wedding photographer will reflect on the photos and videos we deliver to you, showing you all your joy, your shyness, your charm and the emotion of your new life that begins now, together. Our only goal is to make the memory of your marriage with our photographic services even more unforgettable and memorable than it already is, not only in the heart and in the memory, but also in the albums and DVDs you will clasp in your hands, whose you don't even think how many times you will be looking at, whose you will never get bored of, because they are and will always be the sheer guardians of your promise of eternal love.

● PROJECTS

Vodafone Redy - Everything under your control

Partnership with Vodafone Italia on 12-13/04/16.

Key target: Create a user assistance reality able to help the customer to obtain a worry-free experience in usage of their mobile data, avoiding them being scared from paying more because of this.

When you think about application development, you must guess the key role it has to cover once available to thousands of people: you want your final customers to be happy e satisfied by what you have created, this is going to make the app representing the brand, a very useful way to get confidence from the vastity of customers and why not, you can think about a economic income consequent to user happiness.

We tried guessing out what in real life may show a worry-free fact to reach this grade of satisfaction. We get the conclusion to work around the idea of a manager which employs a secretary to reduce his stress caused by a variety of schedule and things to be done; Redy, our project, promises to do this for every Vodafone customer.

Indoor WiFi Fingerprinting

Partnership with University of Genua on early 2016.

Android app development. Used to establish a estimated position (x,y) of the user within an indoor environment using a deterministic WiFi fingerprinting algorithm based on triangulation with some access point.

For the Wi-Fi fingerprint, Wi-Fi access point with the highest received signal strength (RSS) is denoted as the important access point. At the localization stage, the fingerprints are chosen with the same important access points (IAP) as the estimated fingerprint from the database. Then, the distance and the AP repetition of the fingerprints are used to calculate the similarity degree. The location of the fingerprint which matches the estimated fingerprint well can be regarded as the estimated location.
